# ABOUT US

Anonymous Astronauts is a pioneering digital art project that embarked on its cosmic journey in 2021. Born on the innovative Songbird network, we've since navigated through the vast expanse of the digital universe, leaving our mark with multiple successful collections on the XRPL in 2022.

Our mission transcends the creation of mere digital assets; we aim to breathe life into our art. With the launch of Climaax Project, we're not just crafting images; we're sculpting experiences. As vanguards of 3D artistry in the blockchain realm, we're committed to offering our members unparalleled three-dimensional experiences across a multitude of platforms and blockchains.

The year 2023 was a time of introspection and fortification, as we focused on building and securing our token lock-up program amidst a decline in our project's collections. Yet, with the dawn of 2024, we embraced change management, reinforcing our unwavering commitment to our community. The essence of Anonymous Astronauts remains unaltered: **to deliver exceptional artwork fused with the finest utilities.**

As we continue our odyssey, we stand firm in our promise to our holders. The future is bright and it's rendered in stunning 3D. Join us as we chart a course through the digital cosmos, where art meets innovation and every token is a ticket to a new dimension.

# MULTI-CHAIN EXPANSION

Our **multi-chain expansion strategy** aims to tap into diverse markets, leverage technical advantages of different blockchains, launch innovative NFT collections, reward our community and ensure sustainable growth. We'll also seek collaborations to create unique cross-chain experiences.

This decision is rooted in several compelling reasons that align with our vision for the future and the broader NFT ecosystem:

## **Embracing Diversity:**

By expanding to multiple blockchains, we aim to tap into various communities and markets, each with its own culture and preferences. This allows us to introduce our 3D art to a broader audience and cater to a wider range of tastes and interests.

## **Technological Synergy:**

Different blockchains offer distinct technical advantages. Our expansion will enable us to utilize these strengths, such as faster transaction speeds, lower fees, or more advanced smart contract capabilities, to provide a seamless experience for our collectors.

## **Innovative Collections:**

With each new blockchain we venture into, we plan to launch innovative NFT collections that resonate with the platform's unique features and user base. This ensures that our art remains fresh, relevant and exciting.

# MULTI-CHAIN EXPANSION

## **Community Rewards:**

A key component of our expansion is the integration of community rewards. A portion of the profits from new collections will support our buy-back and burn process, directly benefiting our token holders and NFT collectors.

## **Sustainable Growth:**

We're committed to a responsible expansion that prioritizes long-term sustainability over short-term gains. This means carefully selecting blockchains that align with our values and ensuring that our growth does not compromise the quality or integrity of our art.

## **Collaborations and Partnerships:**

To maximize the potential of our multi-chain presence, we'll seek collaborations and partnerships with other projects and artists in the space. These alliances will help us innovate and create unique cross-chain experiences.

**Our multi-chain expansion is more than just a growth strategy; it's a commitment to innovation, community and the boundless potential of digital art.** As we continue to explore new horizons, we invite our community to join us on this exciting journey.

# TOKENOMICS

At Anonymous Astronauts, we're dedicated to enhancing value for our community. While the core \$AAX Tokenomics remains steadfast, we're excited to **introduce a dynamic buy-back and burn process to amplify rewards within our ecosystem.**

As we venture into new territories and expand across multiple blockchains, a portion of our journey's profits will fuel this initiative. Specifically, 5-10% of the total profits from new collections will be allocated towards the repurchase of AAX tokens or for sweeping the floors of existing AA NFT collections.

**This strategic maneuver serves a dual purpose:**

- 50% of the acquired AAX/NFTs will be burned, effectively reducing the total supply and increasing scarcity.
- The remaining 50% will be transferred to the Donation Wallet, earmarked for community giveaways and prizes, fostering engagement and excitement.

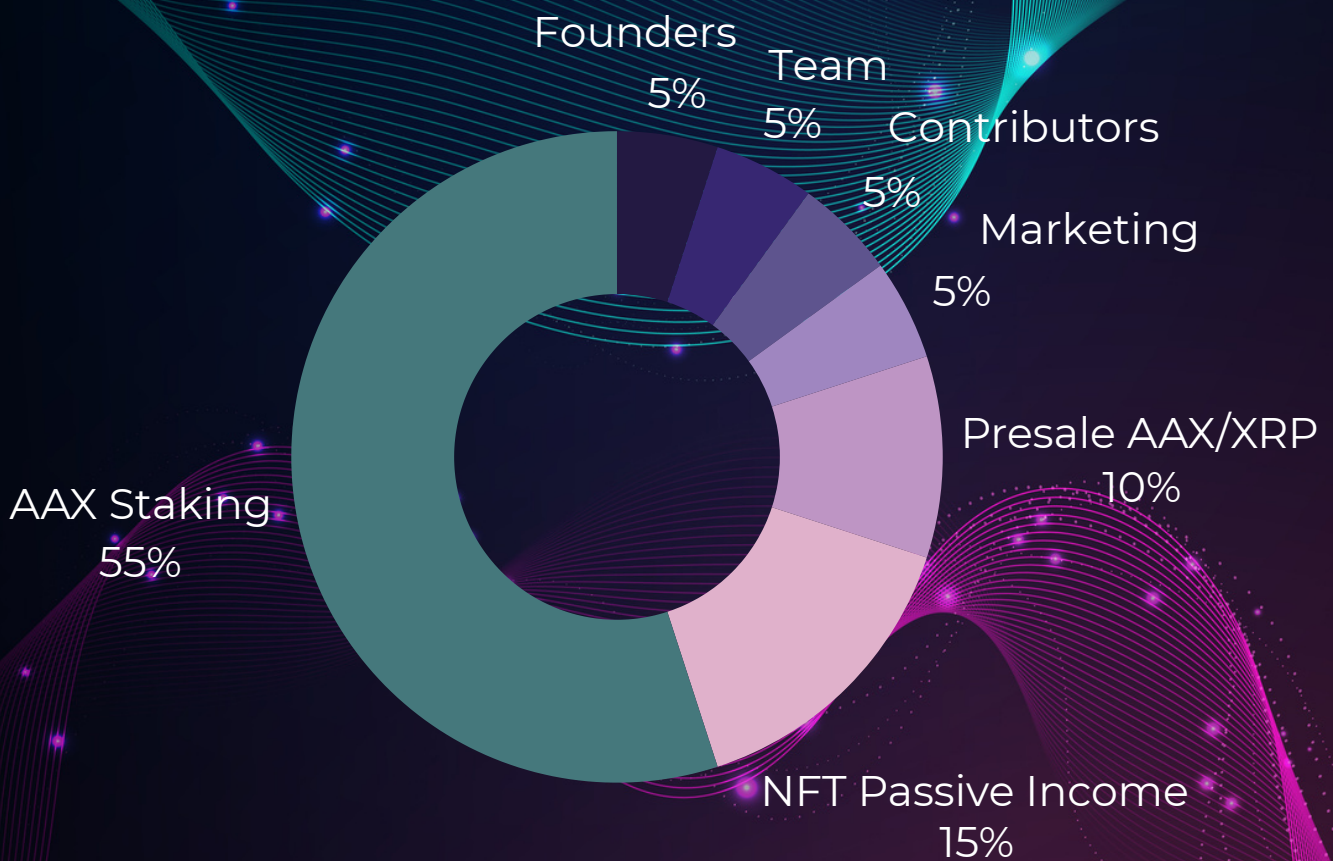

Moreover, as we launch new collections on the XRPL, they will be exclusively available through AAX tokens, further integrating our token into the fabric of our offerings and ensuring that our members are the first to experience the new frontiers of digital art.

# TOKENOMICS

**\$AAX serves as the native token** on the XRPL within the project and operates as a **deflationary asset**.

The initial total supply of AAX is capped at **1 million tokens**.

## AAX Circulating Supply

# AAX & NFTS UTILITIES

As part of our ongoing commitment to innovation and community engagement, we are excited to announce the deployment of new utilities for our NFTs. These utilities are designed to **foster deeper interaction within our ecosystem and provide our community members with unique opportunities and experiences.**

## **AAX Burn and Airdrops:**

XRPL holders will benefit from the AAX burn mechanism plus monthly drops based on their NFTs holdings.

## **AAX Staking:**

Holders can stake their AAX tokens in our dApp for different lock periods, earning different yields based on the length of the lock period. This provides a unique opportunity for token holders to grow their investment passively over time.

## **AAX Presale launch:**

Our AAX tokens are set to go on presale at a later stage, aligning with our strategic Time To Market approach.

## **AAX Auctions & New Collections:**

AAX tokens facilitate the auction and the purchase of new NFT collections on the XRPL. By holding AAX tokens, users gain the exclusive opportunity to participate in auctions, bidding on unique digital assets using their tokens, and buying new NFTs release (Avatars, etc...).

# AAX & NFTS UTILITIES

## **Merch store:**

In the future, as AAX liquidity increases in the market, users will have the opportunity to purchase a wide range of merchandise, offering a seamless and integrated shopping experience.

## **Staking and Delegation Rewards:**

We will allocate a percentage of the income from chains that allow staking and delegating back to the NFT holders of that chain (such as Flare, Songbird and others yet to be selected). This means that everyone benefits, regardless of the chain they hold NFTs from.

## **Metaverse Experiences:**

As we mature in our metaverse investments, xSPECTARverse will be the first metaverse we integrate with. Get ready to immerse yourself in diverse worlds where socializing, gaming, music, fashion and visual arts converge through our innovative designs.

## **Gaming:**

Specific NFT collections will unlock a new dimension of engagement by providing access to immersive gaming experiences. AASGB NFTS will gain access to Kings of Rings game on Polygon network.

New collections will enable players to participate in 'play to earn' games like blackjack, among others, as well as additional unrevealed games.

# ROADMAP

The milestones outlined in **this roadmap are our current objectives and goals**. However, they are subject to change based on a variety of factors, including but not limited to, changes in business strategy, market conditions or technological advancements.

## Q2 2024

- Launch Astro Jack NFT gaming collection on Songbird
- xSPECTARverse Beta testing

## Q2+ 2024

- Launch collections on Flare & other chains
- Avatars release
- AAX presale

## Q1 2024

- Gaming Partnership
- Metaverse Partnership
